Matteo Cardellini

App Developer

Hi! I'm Matteo, I'm a passionate developer who is constantly looking for new things to learn and methods to improve himself. Technology and science are my two great passions.

I'm an Engineering student at Unige by day and a freelance developer by night at my own company SmileApp

Scientific Highschool
Liceo Scientifico C. Colombo
2010 - 2016 | 90/100

Android Developer Nanodegree
Udacity (Scholarship by Google)
02/2017 - present

UDACITY

Reviews

"Sablono and I personally, welcomed Matteo already two times in our office at Berlin. He is a very passionate and smart developer with high self motivation to quality and elegance on the work he delivers - on paper and digital.

I'm highly recommending him as front end developer and engineer but I also see a high potential on other coding topics. I wish you all the best and hope to welcome you another time in Berlin.

Mathias Bergmann
Software Developer, Sablono GmbH

"I've worked with Matteo during his internship at Sablono, in Berlin.
He is not only a talented developer and good learner, but also a very nice person to work with. He always has very good ideas and delivers good quality work, and also knows how to work in a team.

He has high potential, and is always curious about new technologies and tools. I totally recommend him.

Belèn Agüeras Angulo
Senior Frontend Engineer, Sablono GmbH

Working Experiences

Freelance Developer
02/2015 - Present
`Angular` `HTML` `LESS` `Cordova/Ionic` `NodeJS`

SmileApp 📍 Genoa, Italy

As soon as I turned 18 I started my own freelancer activity, SmileApp, building mobile applications and websites for stores and companies in my hometown, Genoa. In my portfolio I have many clients, among which stand out an important phone reseller, Stylecar, with over six thousand clients registered in the application that I built, and a medical and dentistry conference organiser, e20, with more than forty thousand clients all over Italy.

Front End Developer, Intern
07/2016 - 09/2016
`NodeJS` `Socket.io` `GCM` `APNs`

Sablono GmbH 📍 Berlin, Germany

My amazing experience at Sablono and the awesome people that I met during the previous summer were the reason I decided to come back in the summer of 2016 to work again at Sablono. This time, besides building the Sablono platform, I also lead some side projects, that has been later implemented in the main workflow, implementing a live communication between the web platform and the mobile application using NodeJS and Socket.io and a system of push notifications through APNs and GCM.

Front End Developer, Intern
06/2015 - 09/2015
`Angular` `HTML` `LESS` `Cordova/Ionic`

Sablono GmbH 📍 Berlin, Germany

Sablono is an IT Company based in Berlin which provides a web application for construction companies to easily track their progress across multiple construction sites. My work was to build clear and efficient user interfaces for the web application employing AngularJS as the main framework. This experience made me really understand the working environment and how big teams operate together to achieve a common goal through methods like Git for the versioning and publishing control and the Agile Method Scrum for managing the product development.
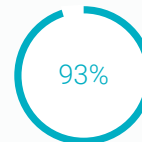

Professional Skills

98%
HTML, CSS, Javascript
Expert, 4 years
I'm able to build beautiful and responsive websites with complex layouts using HTML5, LESS and Javascript.

93%
AngularJS
Expert, 3 years
Able to implement a complete user interface in the form of a mobile and desktop web app, with a focus on performance and design.

70%
Java & Android
Proficient, 1 year
As an Udacity student I've been taught the foundamentals of Android and all the steps needed to follow the Android Design Principles

Other Skills

`LESS` `Git` `PHP` `MySQL` `NodeJs` `Ionic` `C++` `AWS` `Scrum` `Grunt` `npm` `Italian` `English` `Photoshop` `Illustrator`
